TechACCESS of RI Assistive Technology Services for Children with Disabilities

TechACCESS of RI provides Assistive Technology (AT) services for children and students from Early Intervention (Birth to 3) to Grade 12 (or the age of 21). We also provide services to educational team members and families to insure that they are able to support students fully in school, the community and at home.

AT allows children to communicate (AAC), learn, navigate their environment and accomplish educational and daily living tasks, with increased independence.

Our expert staff consists of certified Speech Language Pathologists, Occupational Therapists and RESNA certified Assistive Technology Professionals.
